EPISODES A WEEK

THE SHOW

High - Lvl Daily is a live desk show that takes the day's technology, culture, and political stories and tells the audience what they mean for people building something. Host 19Keys opens every episode with a monologue, then works the news with producer and co-host B. Amechi at the Desk: Tech News, Culture, and Politics in whatever order the day demands, with money running through all three. Every episode closes with The Shoutout of the Day, a call-in segment for Ziion members called The Seat, and one clear next step.

THE CLOCK

Monday through Friday, 4:44pm PT / 7:44pm ET. Thirty minutes, same rundown every day. Live on YouTube, Instagram, X and inside Ziion; audio on every podcast app; clips, a written brief and companion audio within hours.

THE RUNDOWN

MOVE	WHAT IT IS
The Desk Opens	B. Amechi frames the day and hands to 19Keys
The Monologue	One idea, unscripted, the clip that travels
The News	Tech News · Culture · Politics, color-coded, two or three stories each
The Shoutout of the Day	One person, project or moment the culture should honor
The Seat	A Ziion member calls in live
The Close	Tomorrow's tease, one next step, sponsors by name

19KEYS · HOST

Global futurist, AI educator and host of High Lvl Conversations, the interview series that has reached more than sixty million viewers. Founder of the HIGH - LVL NETWORK, the Ziion creator platform, the functional-coffee brand Supermind and the nonprofit Project High Lvl, he has toured seventeen cities teaching AI literacy as the new financial literacy. On the Daily he is the take: what today means for the people building tomorrow.

B. AMECHI · PRODUCER AND CO-HOST, THE DESK

Integrator of the 19Keys ecosystem and co-founder of High - Lvl Media, the production company behind the network. Founder of CNFDNT, a community for the operators who run visionaries' worlds. On the Daily he runs the clock, frames every story and plays the other side, so the desk always shows both sides of the take.

A daily property inside an investable network.

High - Lvl Daily is the anchor show of the HIGH - LVL NETWORK, the media company 19Keys is building the way a16z built a publishing arm around a worldview. The network holds the shows, a production service priced per seat, the Ziion community platform, the Creator Growth program, the Africa+ trade bridge, the Supermind product line and the Project High Lvl nonprofit. The Daily is the front door to all of it: five episodes a week, one fixed clock, a brand system built to be copied by every show that follows.
